

## FIVE-STAR LUXE

"Although this bathroom was built a few years ago, it still possesses the glitz and glamour of a bathroom in a luxurious five-star hotel. It has received plenty of on-line interest and has been shared across many social image platforms in this time. This proves that a well-designed space will remain fashionable for years. In keeping with the grandeur of the rest of the home, everything about this multi-award-winning bathroom is super-sized, from the roomy double shower to the oversized spa bath complete with headrests set in 100mm mitred stone. The layout has been carefully considered to provide an indulgent escape from everyday life. The spa is positioned for easy viewing of the television, while the toilet area, encompassing a toilet and bidet, is hidden out of sight behind a striking feature wall. A modern double vanity and two walk-in-robos for the separate storage of necessities extend a his-and-hers theme throughout the bathroom. The colour palette is simple, clean and sophisticated to enhance the overall feel of space and light. This effect is heightened by a flow of natural light that pours in from the floor-to-ceiling windows, highlighting the gleaming porcelain tiled floor and sparkling frameless shower. The result is simply breathtaking."

**Designer: Bubbles Bathrooms Design Team**

*We love everything about this indulgent space – from the oversized bath and shower to the polished tiles.*
