

BLACK, WHITE AND GREEN

"Bold colours, subtle lighting and garden views exude a sense of luxury and calm in this striking master ensuite. The bathroom was built around the black free-standing stone bath, which effortlessly commands attention with its sculptural form. A cleverly designed 'podium' provides landing space close to the bath and is the perfect spot for scented candles or even a glass of your favourite bubbly. Millimetre-perfect placement of the bath was crucial to the success of the design so as not to disrupt access to the shower. The windows were also resized to enhance the garden views and bring in more natural light. Around the bath, a clever play of alternating black and white flows across fixtures, fittings and finishes to create a stunning balance of form and colour. Light grey travertine wall tiles balance the solid black bath, while black and white flora feature tiles add visual interest and pay homage to the garden. The owners also wanted a shower with lots of water, so we used multiple showers with water-saving showerheads to create a spa-like effect. Chromotherapy lighting in the ceiling shower and under cabinets gives an overall dreamy atmosphere to this tranquil master bedroom retreat."

Designer: Bubbles Bathrooms Design Team

We love the perfect balance of the solid black bath with the natural surroundings.

We love the energy-efficient LED lights and heating solutions.
